Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn according to the appeal conference decision.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 33-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Esmailzadeh et al. (US 6,163,533).

Regarding claim 35, Esmailzadeh et al teach a data receiving method of a receiver (fig. 3) in use with a mobile wireless communication system in which a transmitter (fig. 2) adds a preamble (pre-amble spreading code, fig. 2) for detecting reception power intensity in a receiver side (peak detection, fig. 3) to transmission data (data field, fig. 2), and sends the resultant signal as a transmission signal, and the receiver side detects the reception power intensity by use of the preamble

Art Unit: 2618

contained in the transmitted signal (col. 3, lines 3-7), the data receiving method comprising:

receiving the transmission signal in which the preamble (pre-amble, figs. 1-2) for detecting reception power intensity in the receiver side is located preceding to the transmission data (data field, figs. 1-2) in the transmitter side and a random pattern is used for the preamble (col. 2, lines 15-20); and detecting the reception power intensity by use of the preamble (peak detection, col. 3, lines 4-7).

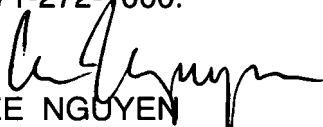

Regarding claims 33-34 and 36-38, the claims are just alternate recitation of claim 35; therefore, they are interpreted and rejected for the same reason as set forth in claim 35.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEE NGUYEN whose telephone number is 571-272-7854. The examiner can normally be reached on 8:00 - 4:30.
